2			Using *suvat* equation(s) with $s = 1.5, u = 0, t = 0.9$ $s = ut + \frac{1}{2}at^2$ $1.5 = \frac{1}{2}a \times 0.9^2$ Giving $a = 3.70 \text{ m s}^{-2}$	 **M1** **A1** **[2]**	 **3.1b** **1.1**	Allow for chain of equations leading to a value for *a* Allow for 3.7
