Question			Answer	Marks	AOs	Guidance	
5			Let AB = c and BC = a				
			Using perimeter $a+c+13=32$ giving $a+c=19$	**M1**	**3.1a**	Forming an equation – need not be simplified	
			Using area $\frac{1}{2}ac\sin B=\frac{1}{2}ac\times\frac{4}{5}=24$ giving $ac=60$	**M1**	**3.1a**	Forming another equation – need not be simplified	
			Solving simultaneously $a(19-a)=60\Rightarrow a^2-19a+60=0$	**M1**	**1.1**	Attempt to solve their non-linear simultaneous equations	
			Giving $a=4$ or 15	**A1**	**1.1**	Correct roots of quadratic	
			AB is the shortest side, so AB = 4 cm and BC = 15 cm	**A1** **[5]**	**3.2a**	Must be the right way round
