				[2]		
12	**(a)**		$\overline{X} = 2.1$	**B1**		
			$\frac{604-100\times2.1^2}{99}$ **oe**	**M1**		
			variance = 1.64646…	**A1**	Accept to 3 or 4 sf or as recurring decimal or accept $\frac{163}{99}$	
				[3]		
12	**(b)**		$n = 10$ $p = 0.21$	**B1** **B1FT**	Ft from their 2.1	
				[2]		
12	**(c)**		binomPdf(n, p, 2) used	**M1**	FT their n and their calculated p; may be implied by 0.301…	

Question			Answer	Marks	Guidance	
			100 × binomPdf(10,0.21,2)	**M1**	FT 100 x their prob from Binomial distribution	
			f_e = 30.1	**A1**	Accept 30 for final answer
