9	**(a)**		$0.1 + 0.3 + q + 2q + 3q = 1$ $q = 0.1$	**M1** **A1**	**1.2** **1.1**	Setting sum of values equal to 1
				[2]		
9	**(b)**		(0.1 + 0.3 + 0.1 + 0.2 =) 0.7	**B1**	**1.1**	Or $1 - p(X = 5)$
				[1]		
9	**(c)**		0.1 × 0.3 seen or 0.03 seen	**M1**	**1.1**	
			0.1 × 0.3 + 0.1 × 0.3 = 0.06	**A1**	**1.1**	0.06 o.e $\frac{6}{100}$ or $\frac{3}{50}$ etc
				[2]		
9	**(d)**		0.098314…correct to 2 or more sf BC	**B1**	**1.1**	By using e.g $X \sim B(50,0.3)$ and finding $P(X = 17)$
				[1]
