**1** A researcher collects data concerning the number of different social media platforms used by school pupils on a typical weekday.

The frequency table for the data is shown below.

| Number of different social media platforms | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|---|---|
| Frequency | 2 | 5 | 9 | 15 | 8 | 5 | 4 | 1 |

The researcher uses software to represent the results in this diagram.

**(a)** Explain why this diagram is inappropriate. **[1]**

**(b)** Calculate the following for the number of social media platforms used:

**(i)** the mean, **[1]**

**(ii)** the standard deviation. **[1]**
