1 A researcher collects data concerning the number of different social media platforms used by school pupils on a typical weekday.

The frequency table for the data is shown below.

Number of different social media platforms	0	1	2	3	4	5	6	7
Frequency	2	5	9	15	8	5	4	1

The researcher uses software to represent the results in this diagram.

(a) Explain why this diagram is inappropriate. **[1]**

(b) Calculate the following for the number of social media platforms used:

(i) the mean, **[1]**

(ii) the standard deviation. **[1]**

1(a)	
1(b)(i)	
1(b)(ii)
