Question	Working	Answer	Mark	Notes
11 (a)		36	M1	demonstrates the start of a method that could lead to the answer, eg recognition of square numbers, **or** use of differences, **or** diagrams
			A1	cao
(b)		80	M1	demonstrates the start of a method that could lead to the answer, eg repeated addition of 4, **or** 20×4
			A1	cao
(c)			C2	conclusion with supportive evidence, eg odd × odd = odd, **or** all odd numbers squared will be odd.
			(C1)	(e.g. starts to work with (generate) square numbers for odd patterns or $(2n + 1)^2$ eg $1 \times 1 = 1$, or generates sequence for squares using differences)
