Question	Working	Answer	Mark	Notes
18 (a)		6 to 8	M1	evidence of recall of area formula with correct radius e.g. $\pi \times 10^2$
			M1	calculation to find number of boxes, (area) ÷ (coverage figure)
			M1	(indep) evidence of estimation, eg π in range 3 to 3.2, or coverage figure of 40, 42, 45, 48 or 50
			A1	(dep on M3) answer in the range 6 to 8
(b)		underestimate	C1	e.g. (ft from (a)) underestimate: true area greater so could need more boxes. Must relate to estimation, not rounding of answer.
