Question	Answer	Mark	Mark scheme	Additional guidance
16 (a)	14	M1	for 4×5 and 3×-2, the substitution may be seen in two separate calculations, eg 4×5 (= 20) and 3×-2 (= −6)	
		A1	cao	
(b)	$4e^2 + 8e$	B2	for $4e^2 + 8e$	
		(B1	for $4e^2$ or $8e$)	Note: $4e^2 + 8e = 12e^3$ for example gets B1 only
(c)	11	M1	for a correct first step eg $3 \times m - 3 \times 4 = 21$ oe **or** $m - 4 = 21 \div 3$ (= 7) oe	Showing ÷3 by each side of equation is sufficient
		A1	cao
