Question	Answer	Mark	Mark scheme	Additional guidance
29 (a)	6	M1	for stating a similar triangle relationship eg $\frac{AB}{PQ}=\frac{AC}{PR}=\frac{CB}{RQ}$ or equivalent set of similar triangle expressions or for substitution giving a fraction form for a scale factor eg $\frac{10}{15}\left(=\frac{2}{3}\right)$ or $\frac{15}{10}\left(=\frac{3}{2}\right)$ or $\frac{9}{15}\left(=\frac{3}{5}\right)$ or $\frac{15}{9}\left(=\frac{5}{3}\right)$	Accept any equivalent fractions or decimal equivalents given to at least 2 dp truncated or rounded
		A1	cao	
(b)	2	P1	for showing understanding of the properties of congruent triangles by finding an unknown length using matching of two sides, eg *EG*, *KG* and 6, or *HG*, *FG* and 4 **or** matching corresponding angles eg *HEG* with *FKG* **and** *EHG* with *KFG*	Can be shown by any complete statements that are unambiguous Can be shown in working using algebraic statements, or given by unambiguous marking on the diagram to confirm the relationship.
		A1	cao
