Question	Answer	Mark	Mark scheme	Additional guidance
29	6 : 15 : 20	P1	chooses a multiplier to equate the two fractions in terms of b eg $\frac{2}{5}\times\frac{3}{3}\left(=\frac{6}{15}\right)$ **or** $\frac{3}{4}\times\frac{5}{5}\left(=\frac{15}{20}\right)$ **or** lists equivalent fractions to $\frac{2}{5}$ up to at least $\frac{6}{15,}$ eg. $\frac{2}{5},\frac{4}{10},\frac{6}{15},\ldots..$ **or** lists equivalent fractions to $\frac{3}{4}$ up to at least $\frac{15}{20}$, eg. $\frac{3}{4},\frac{6}{8},\frac{9}{12},\frac{12}{16},\frac{15}{20},\ldots..$ **or** (*a* : *b* =) 2 : 5 **and** (*b* : *c* =) 3 : 4 **or** for 6 : 15 or 15 : 20 seen	
		P1	puts into related terms ready for ratio eg $\frac{2}{5}\times\frac{3}{3}=\frac{6}{15}$ **and** $\frac{3}{4}\times\frac{5}{5}=\frac{15}{20}$ **or** for (*a* : *b* =) 6 : 15 **and** (*b* : *c* =) 15 : 20 **or** lists equivalent ratios up to a common element for *b*, eg *a* : *b* = 2 : 5, 4 : 10, 6 : <u>15</u> **and** *b* : *c* = 3 : 4, 6 : 8, 9 : 12, 12 : 16, <u>15</u> : 20	Need not be written in ratio form
		A1	for 6 : 15 : 20 oe	Accept equivalent ratios Accept *a* = 6. *b* = 15 and *c* = 20
