Question	Answer	Mark	Mark scheme	Additional guidance
16	19	P1	for process of finding perimeter in terms of x, eg $2x - 5 + x + 1 + x - 1 + 2x$ oe	
		P1	for process to form equation, eg "$6x - 5$" = 52	This mark may be awarded for a correct but unsimplified equation, eg. $2x - 5 + x + 1 + x - 1 + 2x = 52$ oe
		P1	(dep on P2) for a correct process to find x, eg $(52 + 5) \div 6$ (= 9.5) **or** for a correct process to find $2x$, eg $(52 + 5) \div 3$	Trial & Improvement attempts must be fully correct giving $x = 9.5$ before any credit given
			or ft an equation of the form $ax + b = c$,	a, b and c must be clearly stated but need not be correct
		A1	cao
