Question	Answer	Mark	Mark scheme	Additional guidance
26 (a)	$x > 6$	M1	for a correct first step, eg subtracts 3 from both sides or multiplies all terms by 2	Could be seen as an equation for both method marks, eg $5x + 6 = 36$ or $5x = 30$
		M1	(dep M1) for a correct second step, eg multiplies both sides by 2 **or** divides both sides by 5 **or** gives the critical value, 6.	First 2 marks may be awarded for critical value of 6, eg $x = 6$
		A1	for $x > 6$	
(b)	$(x + 9)(x + 1)$	M1	for $(x \pm 1)(x \pm 9)$ **or** for $(x + a)(x + b)$ where product of a and $b = 9$, eg $(x + 3)(x + 3)$ or $(x – 3)(x – 3)$ or the sum of a and $b = 10$, eg $(x + 5)(x + 5)$ or $(x + 6)(x + 4)$	
		A1	for $(x + 9)(x + 1)$
