Question	Answer	Mark	Mark scheme	Additional guidance
17	3.5	M1	for correct expansion of brackets, ie $8x - 10$ **or** dividing throughout by 2 as a first step to solve equation, eg $4x - 5 = 9$	For M marks step must be carried out not just intention shown. For example, if you see $2(4x - 5) = 18$ $\div 2 \qquad \div 2$ Award M1 for: $4x - 5 = k$ with $k \neq 18, 36$
		M1	for isolating terms in x, eg $8x = 18 + 10$ **or** $4x = 9 + 5$	ft their equation of the form $ax \pm b = c$ For example, if you see $8x - 10 = 18$ $+10 \qquad + 10$ Award M1 for: $8x = k$ with $k \neq 8, 18$
		A1	for 3.5 **or** $3\frac{1}{2}$ oe **or** $\frac{7}{2}$ oe
