| Question | Answer | Mark | Mark scheme | Additional guidance |
|---|---|---|---|---|
| 26 | 7.5 | P1 | for process to find the number of empty jars<br>eg $3 \div 8 \times 400$ oe (= 150) | |
| | | P1 | for start of process to deal with ratios<br>eg 3 : 4 and 4 : 8 **or** 3 : 4 : 8 oe | |
| | | P1 | for process to find the number of empty small jars<br>eg $\frac{3}{3+4+8}\times$ "150" oe (= 30) **or** 30 : 40 : 80 | |
| | | P1 | for process to find percentage, eg $\frac{"30"}{400}\times 100$ oe or $\frac{"7.5"}{100}$ | |
| | | A1 | for 7.5 or $7\frac{1}{2}$ oe | |
| | | | **OR** | |
| | | P1 | for start of process to deal with ratios<br>eg 3 : 4 and 4 : 8 **or** 3 : 4 : 8 oe | |
| | | P1 | for process to find the proportion of the empty jars that are small<br>eg $\frac{3}{3+4+8}$ $(=\frac{1}{5})$ | |
| | | P1 | for process to find the proportion of Kasim's jars that are empty small jars<br>eg $\frac{3}{8}\times "\frac{1}{5}" (=\frac{3}{40})$ | |
| | | P1 | for process to find percentage, eg $"\frac{3}{40}" \times 100$ oe or $\frac{"7.5"}{100}$ | |
| | | A1 | for 7.5 or $7\frac{1}{2}$ oe | |
