Question		Answer	Mark	Mark scheme	Additional guidance
16		5	P1	for start to process eg 7×20 (= 140) **and** 3×21 (= 63) **or** $(7 \times 20) + (3 \times 21) + 22$ (= 225)	May be written near table 7×20 (= 140) **and** 3×21 (= 63) minimum requirement for P1
			P1	for a complete process to find the missing frequency eg (320 – "225") ÷ 19 **or** 320 – "225" = (95) **and** "95" ÷ 19	May be seen as two calculations
			A1	cao	Please check the table. Correct answer in the table without working award 3 marks
