Question		Answer	Mark	Mark scheme	Additional guidance
8		19.85	P1	for a start to the process eg 30 ÷ 6 (=5) **or** 30 ÷ 15 (=2) **or** 30 ÷ 10 (=3) **OR** 30 × 37 (=1110) **OR** 82 ÷ 6 (=13.6 to 13.7) **or** 45 ÷ 15 (=3) **or** 1.25 ÷ 10 (=0.125)	
			P1	for process to find cost of 30 pens **or** 30 pencils **or** 30 rulers eg "5" × 82 (= 410) **or "**2" × 45 (= 90) **or** "3" × 1.25 (= 3.75) **OR "**13.6.." × 30 (=409.8 to 410) **or** "3" × 30 (=90) **or** "0.125" × 30 (=3.75)	Work may be in pence or in pounds
			P1	for a process to find cost of 2 of 30 pens **or** 30 pencils **or** 30 rulers eg any 2 of "5" × 82 (= 410) **, "**2" × 45 (= 90) **,** "3" × 1.25 (= 3.75)	Intention to add not necessary eg 410, 3.75 is sufficient, or working leading to these figures Any two correct methods will imply P1P1P1
			P1	for adding at least 3 different costs (units may not be consistent) eg "410" + "90" + "3.75" **or** "410" + "90" + "11.10"	Correct working for 3 of pens, pencils, rulers and pencil cases with an intention to add, may be in a mixture of money units
