| Question | Answer | Mark | Mark scheme | Additional guidance |
|---|---|---|---|---|
| 21 | Graph | B3 | for a correct line between $x = -2$ and $x = 4$ | |
| | | (B2 | for a correct straight line segment through at least 3 of $(-2, -7)$, $(-1, -5)$, $(0, -3)$, $(1, -1)$, $(2, 1)$, $(3, 3)$, $(4, 5)$<br><br>**or** for all of these points plotted but not joined<br><br>**OR** for a line drawn with a positive gradient through $(0, -3)$ **and** clear intention to use a gradient of 2, eg line through $(0,-3)$ going across 2 squares and up 4 squares ) | Ignore any incorrect points. Points need not be plotted for a correct line (segment) drawn<br><br>Table of values<br>$x$ : –2, –1, 0, 1, 2, 3, 4<br>$y$ : –7, –5, –3, –1, 1, 3, 5 |
| | | (B1 | for at least 2 correct points stated or plotted<br><br>**OR** for a line drawn with a positive gradient through $(0, -3)$<br><br>**OR** a line with gradient 2) | Ignore any incorrect points<br>Coordinates may be in a table or in working |
