Question	Answer	Mark	Mark scheme	Additional guidance
14	Correct pie chart	M1	for a method to find at least one angle eg $\frac{50}{(50+45+25)} \times 360$ (= 150) **or** $\frac{45}{(50+45+25)} \times 360$ (= 135) **or** $\frac{25}{(50+45+25)} \times 360$ (= 75) oe	
		A1	for at all 3 angles correctly calculated **OR** at least one correct and accurately drawn angle (from no more than 3 sectors)	Do not award for drawing if the intention is to show more than 3 sectors 3 angles correct in table is enough for this mark irrelevant of diagram
		A1	for a fully correct labelled pie chart	Labels as "City" from table not just angle size.
