Question	Answer	Mark	Mark scheme	Additional guidance
12 (a)	9	B1	cao	
(b)	6	M1	starts to find input using inverse operations eg $154 \div 11$ (= 14) **or** indicates $\div 11$ **and** -8 **or** derivation of equation eg $(8+n) \times 11 = 154$ **or** starting to solve for unknown eg $154 - 8 \times 11$ (= 66)	$\div 11$ and -8 could be seen in a flow diagram Evidence could be provided by algebraic statement, numerical statements or by diagram
		A1	cao
