Question	Answer	Mark	Mark scheme		Additional guidance
19	1.19	P1	process to find number of small bags that can be filled, eg [3kg] ÷ 150 (= 20) oe		[3kg] must be 3 and zeros only eg 300 Build up methods are allowed to imply process
		P1	for starting a process to work with percentage for cost of box, eg 17.60 × $\frac{35}{100}$ (= 6.16) **or** 100 + 35 (= 135)	works with starting cost per small bag, 17.60 ÷ "20"	Cost per small bag given as £0.88 will imply P1P1
		P1	for full process to work with percentage increase, eg 17.60 × $\frac{"135"}{100}$ (= 23.76)	begins process to work with percentage for a small bag, eg "0.88" × $\frac{35}{100}$ (= 0.308)	
		P1	full process to find selling price for small bag, eg "23.76" ÷ "20" (= 1.188)	full process to find selling price for small bag, "0.88" × $\frac{135}{100}$ (= 1.188) oe
