Question	Answer	Mark	Mark scheme	Additional guidance
13	4 pint with correct figures	P1	for a process to find the price for one deal, eg 6 pints on 1st deal, 75 × 2 (= 150) **or** 8 pints on 2nd deal, 128 × 1.5 (= 192) oe	
		P1	for a process to find the price for both deals, eg 6 pints on 1st deal, 75 × 2 (= 150) **and** 8 pints on 2nd deal, 128 × 1.5 (= 192) oe	
		P1	for a process to find the cost per pint for both deals, eg "150" ÷ 6 (= 25) **and** "192" ÷ 8 (= 24) **or** for prices for a consistent number of pints for both deals eg for 2 pints "1.5" ÷ 3 (=0.5) **and** "1.92" ÷ 4 (= 0.48) **or** a comparison using a unit price eg "150" ÷ 6 × 8 (= 200) **and** 128 × 1.5 (= 192) oe	Accept in mixed units of pence and pounds Might look at a price difference for a consistent number of pints
		C1	"4 pint" with two correct comparative costs calculated making full use of both offers	"4 pint" can be indicated in words or other indication
