| Question | Answer | Mark | Mark scheme | Additional guidance |
|---|---|---|---|---|
| 14 | 864 | B1 | (indep) for process to convert to common units,<br>eg 72 × 10 (= 720) or 48 × 10 (= 480) or 24 × 10 (= 240)<br>or 80 ÷ 10 (= 8) or 60 ÷ 10 (= 6) or 20 ÷ 10 (= 2) or<br>**or** "96000" ÷ $10^3$ (= 96) or "82944" × $10^3$ (= 82944000)<br>**or** "0.864" × $10^3$ | This mark can be awarded at any stage<br>One correct conversion for their method is enough for the award of this mark |
| | | P1 | for using volume, eg 80 × 60 × 20 (= 96000) or 72 × 48 × 24 (= 82944)<br>**or**<br>for start of process to find number of packets using one dimension,<br>eg "720" ÷ 80 (= 9) or "480" ÷ 60 (= 8) or "240" ÷ 20 (= 12)<br>or 48 ÷ "8" (= 6) or 72 ÷ "2" (= 36) or 24 ÷ "6" (= 4) | Working may be seen on diagram.<br>May be implied by correctly dividing the areas of corresponding faces |
| | | P1 | for full process with or without unit conversion,<br>eg "82 944 000" ÷ "96000" or "82944" ÷ "96"<br>**or**<br>for "9" × "8" × "12" or "36" × "6" × "4"<br>or "0.9" × "0.8" × "1.2" (= 0.864) | 9 × 24 × 4<br>12 × 24 × 3<br>12 × 6 × 12<br>36 × 8 × 3<br><br>Note sight of digits 864 with decimal point and/or extra zeros scores P2 |
