Question	Answer	Mark	Mark scheme	Additional guidance
26	21	P1	for process to work correctly with initial ratio, eg 120 ÷ 4 × 9 (= 270) **or** 90 + 120 + 60 (= 270)	Can be implied by 90 : 120 : 60 or by a second ratio that totals to 270
		P1	for process to find the value of 1 part in the new ratio, eg "270" ÷ (2 + 5 + 3) (= 27)	
		P1	for process to find both values for Errol, eg ("27" × 3) (= 81) **and** (120 ÷ 4 × 2) (= 60)	
		A1	cao
