Question	Answer	Mark	Mark scheme	Additional guidance
10	120	P1	for process to work with length, eg $40 \div 4$ (= 10) **or** 40×5 (= 200) **or** $40 \div 4 \times 3$ (= 30) **or** 40×4 (= 160)	May be shown on the diagram
		P1	for process to work with perimeter, eg "10" × 12 **or** [square side length] × 12 **or** [square side length] × 11 **or** "200" – 2 × 40 **or** "30" × 4 oe **or** "160" – 40	[square side length] is what they clearly think is the length of one side of the square.
		A1	cao
