Question	Answer	Mark	Mark scheme	Additional guidance
27	25	P1	for working with density, eg 8×1500 (= 12 000) **or** [density] $\times 1500$	P marks can be awarded in either order [density] is 8×10^n Condone $8 \times 1500 \times 300$ for this mark only
		P1	for a correct conversion, eg "12 000" ÷ 1000 (= 12) or $\frac{8}{1000}$ $\left(= 0.008\right)$ **or** 300×1000 (= 300 000) **or** [mass] ÷ 1000	P marks can be awarded in either order [mass] must be what they believe to be mass following a calculation that uses 8 and 1500 but not 300
