| Question | Working | Answer | Mark | Notes |
|---|---|---|---|---|
| 21 | | Shown (supported) | M1 | method to divide a pair of corresponding sides, eg $7.5 \div 3$ (= 2.5) or $3 \div 7.5$ (= 0.4), or states scale factor is 2.5 or 0.4 or method to work out the size of an angle, eg $\tan^{-1}\left(\frac{7.5}{10}\right)$ (= 36.8 to 36.9) |
| | | | C1 | shows or states that all sides are enlarged by the same factor or works out a pair of corresponding angles and states that the two triangles have the same angles |
