Question	Working	Answer	Mark	Notes
18 (a)		$3n + 1$	M1	for a method to deduce the nth term, eg. $3n + k$, where k is an integer or k is omitted or for $n = 3n + 1$
			A1	for $3n + 1$ oe (accept n replaced by another letter)
(b)		No (supported)	C1	for using (their expression in (a)) = 90 or shows that 88 or 91 is in the sequence
			C1	for an answer of "No" and a convincing argument eg. pattern number 30 has 91 counters or $(90 – 1) \div 3$ (= 29.66…) or shows that the next term after 88 is 91 Note: no ft from (a)
