Question	Answer	Mark	Mark scheme	Additional guidance
16 (a)	10	M1	for a start of method to find Bispah's share, eg 2.50×8 (= 20) **or** $\frac{1}{2} \div \frac{1}{8}$ (= 4)	
		A1	cao	Accept 10.00
(b)	1 : 3	P1	for a process to find Chan's share, eg "20" – 2.5 – [Bispah's money] (=7.5) **or** $1 - \frac{1}{8} - \frac{1}{2}$ $(= \frac{3}{8})$	Accept working in pence, or in £ given as a decimal oe NB: award this mark if the working is seen in part (a)
		P1	for a correct ratio eg 2.5 : "7.5" **or** $\frac{1}{8}$: "$\frac{3}{8}$" **or** 3 : 1 oe	Accept 3:1 (correct answer in reverse order) which can also be an equivalent ratio to 3:1
		A1	for 1 : 3 oe eg 5 : 15	Award full marks for 1 : 3 or an equivalent ratio. If an equivalent ratio to 1:3 is shown and then simplified incorrectly award full marks.
