Question	Answer	Mark	Mark scheme	Additional guidance
22	79.76	P1	process to find number of gallons eg 560 ÷ 34.5 (=16.23…) OR finding the miles per litre eg 34.5 ÷ 4.55 (=7.582…)	For P marks allow use of truncated/rounded values
		P1	process to convert from gallons to litres eg "16.23" × 4.55 (=73.855….) OR to work out the cost per gallon eg 4.55 × 1.08 (=4.914) OR finding the number of litres eg 560 ÷ "7.582…." (=73.859…)	
		P1	(dep P2) for a complete process to work out the cost using the operations (560 ÷ 34.5) × 4.55 × 1.08 eg "73.855…" × 1.08 (=79.763…) or "4.914" × "16.23…" (=79.763…) or "73.859…" × 1.08 (=79.763....)	
		A1	for 79.69 to 79.79	To 2 dp but accept 79.7
