Question	Answer	Mark	Mark scheme	Additional guidance
20	118 with reasons	M1	for angle $QPR = 56$ or $CQP = 56$	Angles must be clearly labelled on the diagram or otherwise identified. Full solution must be seen. Correct method can be implied from angles on the diagram if no ambiguity or contradiction. When reasons are given the key words underlined must be present. Reasons need to be linked to their method; any reasons not linked, do not credit. There should be no incorrect reasons given.
		M1	for angle $PQR = (180 - 56) \div 2$ (= 62)	
		C1	(dep on a previous M1) for giving a reason relating to parallel lines: angle $CQR = 180 -$ "62" (Allied angles / Co-interior angles add up to 180) **or** angle $CQP = 56$ (corresponding angles are equal) **or** use "angle QPR" (alternate angles are equal)	
		C1	(dep on a previous M1) for at least one reason given from: vertically opposite angles are equal OR vertically opposite angles are equal **or** base angles of an isosceles triangle are equal **or** Angles in a triangle add up to 180	
		A1	for 118
