Question	Answer	Mark	Mark scheme	Additional guidance
27	10	P1	for a process to use distance = speed × time for either of the parts of Jessica's journey, eg. $6\times\frac{15}{60}$ (= 1.5) or $9\times\frac{40}{60}$ (= 6) or 6 × 15 (= 90) or 9 × 40 (= 360)	
		P1	for a process to add the 2 distances for Jessica, eg $6\times\frac{15}{60}+9\times\frac{40}{60}$ (= 7.5) or 6 × 15 + 9 × 40 (= 450)	
		P1	for complete process to find Amy's average speed, eg. "7.5" ÷ "0.75" oe or "450" ÷ 45	Must be consistent units at this stage.
