Question	Answer	Mark	Mark scheme	Additional guidance
8 (a)	28 33	B1	cao	
(b)	Explanation	C1	for explanation **Acceptable examples** all terms end in 3 or 8 there are no terms that end in 0 50 does not end in 3 or 8 48 and 53 are both in the sequence (could be shown) 48 is in the sequence and 50 is 2 more $5n–2=50$ so n is not a whole number. if it started at 0 then it would but it starts at 3 so it never will or shows sequence continuing up to and beyond 50 **Not acceptable examples** adding 5 each time will not lead to 50 (insufficient) it goes past 50 the closest number to 50 is 48	One correct, one incorrect statement gets C1 as long as they are not contradictory.
