Question	Answer	Mark	Mark scheme	Additional guidance
15 (a)	64 **57** **7** **36** **25** 11	B3	for a fully correct frequency tree	If probabilities used instead of frequencies award a maximum of B2
		(B2	for at least 4 figures correctly placed)	
		(B1	for at least 1 figure correctly placed)	
(b)	$\frac{57}{64}$	M1	$\frac{a}{64}$ where $0 < a < 64$ and a is an integer (ft) **or** $\frac{57}{b}$ where $b > 57$ and b is an integer (ft)	Must be values from their diagram with numerator < denominator
		A1	(ft) for $\frac{57}{64}$ oe	Accept probabilities given as equivalent fractions, 0.89(06…) or 89(.06..)%
