Question	Answer	Mark	Mark scheme	Additional guidance
9	5	P1	for process to work in consistent units, eg 12 × 1000 (= 12000) **or** 105 ÷ 1000 (= 0.105)	May be seen in subsequent calculations
		P1	for process to work with portion size, eg 105 × 3 (= 315) **OR** 12 ÷ [0.105] (= 114.285…)	For [0.105] allow use of 0.105, 1.05 or 10.5
		P1	for process to work with weight of food per week or number of days, eg "315" × 7 (= 2205) **or** "315" × 5 (= 1575) **or** "315" × 6 (= 1890) [12000] ÷ "315" (=38(.095…)) **OR** [114.285…] ÷ 3 (= 38(.095…)) or [114.285…] ÷ 7 (= 16.3…)	For [12000] accept use of 12000, 1200 or 120 For [114.285] allow continued use of incorrectly converted figure from previous mark.
		P1	(dep P2) for process to find number of weeks, eg "12000" ÷ "2205" (= 5.4…) **OR** "38.095…" ÷ 7 (= 5.4…) **OR** "16.3…" ÷ 3 (= 5.4…) **OR** "2205" × 5 (= 11025) **or** "2205" × 6 (= 13230) **OR** 975 **or** -1230	
		A1	cao	If a correct answer is given without supportive working award 0 marks.
