Question	Answer	Mark	Mark scheme	Additional guidance
19	$y = 3x - 2$ drawn	B3	for a correct line between $x = -2$ and $x = 3$	x: −2, −1, 0, 1, 2, 3 y: −8, −5, −2, 1, 4, 7
		(B2	for a correct straight line segment through at least 3 of (–2, –8), (–1, –5), (0, –2), (1, 1), (2, 4), (3, 7) **or** for all of these points plotted but not joined **OR** for a line drawn with positive gradient through (0, –2) **and** clear intention to use a gradient of 3, eg line through (0, –2) going across 2 squares and up 6 squares)	Ignore any incorrect points. Points need not be plotted for a correct line (segment) drawn
		(B1	at least 2 correct points stated or plotted **OR** for a line drawn with positive gradient through (0, –2) **OR** a line with gradient of 3)	Ignore any incorrect points Coordinates may be in a table or in working
