| Question | Answer | Mark | Mark scheme | Additional guidance |
|---|---|---|---|---|
| 13 | 300 | B1 | (indep) for process to convert to common units,<br>eg $3 \times 100$ (= 300) or $1 \times 100$ (= 100) or $1.5 \times 100$ (= 150)<br>or $20 \div 100$ (= 0.2) or $10 \div 100$ (= 0.1) or $75 \div 100$ (= 0.75)<br>**or** "4.5" $\times 100^3$ (= 4 500 000) or "15 000" $\div 100^3$ (= 0.015) | This mark can be awarded at any stage<br>One correct conversion for their process is enough for the award of this mark<br>Working may be seen on the diagram |
| | | P1 | for finding the volume of either shape,<br>eg $3 \times 1 \times 1.5$ (= 4.5) or [300] × [100] × [150] (= 4 500 000)<br>**or** $20 \times 10 \times 75$ (= 15 000) or [0.2] × [0.1] × [0.75] (= 0.015)<br><br>**OR**<br><br>for start of the process to find the number of boxes using one dimension,<br>eg [300] ÷ 20 (= 15) or [100] ÷ 10 (= 10) or [150] ÷ 75 (= 2)<br>or 3 ÷ [0.2] (= 15) or 1 ÷ [0.1] (= 10) or 1.5 ÷ [0.75] (= 2) | [300] = 3 or 30 or "300" or 3000<br>[100] = 1 or 10 or "100" or 1000<br>[150] = 1.5 or 15 or "150" or 1500<br>[0.2] = 20 or 2 or "0.2" or 0.02<br>[0.1] = 10 or 1 or "0.1" or 0.01<br>[0.75] = 75 or 7.5 "0.75" or 0.075<br><br>May be implied by correctly dividing the areas of the corresponding faces<br>eg $\frac{[300]\times[100]}{20\times10}$ |
| | | P1 | (dep on P1) for a complete process with or without unit conversion<br>eg "4 500 000" ÷ "15 000" or "4.5" ÷ "0.015"<br><br>**or** "15" × "10" × "2" | Condone an incorrect attempt to convert volume before division |
| | | A1 | cao | |
