Question	Answer	Mark	Mark scheme	Additional guidance
29	44.9	P1	for process to find an expression for the area of the trapezium, eg ½(12 + *CD*) 8 or 8 × 12 + ½ × 8 × *x* **or** for process to find the area of the triangle, eg 112 – 8 × 12 (= 16)	*x* is the length of the line from *C* to where perpendicular from *B* meets *CD* Allow use of other letters in place of *CD* and *x* (do not have to be defined unless otherwise stated) Award P1 for 112 – 8 × 12 (= 16) even if not used
		P1	for forming an equation and isolating terms in the unknown length, eg 4*CD* = 112 – 48 **or** ½ × 8 × *x* = 112 – 8 × 12 **or** ½ × 8 × *x* = "16" **or** *CD* = 16 **or** *x* = 4	Award P2 for *CD* = 16 or *x* = 4 even if not used unless clearly from incorrect working eg 12 – 8 (= 4) Only award P2 for 16 if it is clearly identified as *CD*
		P1	for start of process to find length of *BC*, eg 8^2 + "4"^{2} (= 80) **or** 8^2 + [their *x*]^2 **or** $\tan^{-1}\left(\frac{"4"}{8}\right)$ (= 26.5…) oe **or** $\tan^{-1}\left(\frac{8}{"4"}\right)$ (= 63.4…) where "4" can be [their *x*]	[their *x*] can be any value less than 12 or clearly identified as the length of the line from *C* to where perpendicular from *B* meets *CD* (may be seen on the diagram)
		P1	for $\sqrt{8^2+"4"^2}$ or $\sqrt{64+"16"}$ or $\sqrt{80}$ or $4\sqrt{5}$ (= 8.9…) oe or $\sqrt{8^2+[\text{their } x]^2}$ **or** $\frac{"4"}{\sin"26.5..."}$ or $\frac{8}{\cos"26.5..."}$ or $\frac{8}{\sin"63.4..."}$ or $\frac{"4"}{\cos"63.4..."}$ where "4" can be [their *x*]	Award P4 for (*BC* =) $\sqrt{80}$ or $4\sqrt{5}$ or 8.9... unless *x* = 4 is clearly from incorrect working
		A1	for answer in the range 44.9 to 44.95	If an answer is shown in the range in working and then incorrectly rounded award full marks
