27 The accurate scale drawing shows the positions of port P and a lighthouse L.

Scale: 1 cm represents 4 km.

Aleena sails her boat from port P on a bearing of 070°

She sails for $1\frac{1}{2}$ hours at an average speed of 12 km/h to a port Q.

Find

(i) the distance, in km, of port Q from lighthouse L,

(ii) the bearing of port Q from lighthouse L.

distance QL = km

bearing of Q from L = °

(Total for Question 27 is 5 marks)
