**16** Four biased coins, A, B, C and D are thrown.

The probability that each coin will land on Heads is shown in the table.

| Coin | Probability |
|---|---|
| A | 0.33 |
| B | 0.033 |
| C | $\frac{1}{3}$ |
| D | 30% |

(a) (i) Which coin is least likely to land on Heads?

**(1)**

(ii) Which coin is most likely to land on Heads?

**(1)**

Julie says,

> "The probability that coin C will land on Heads is the same as the probability that coin C will land on Tails."

(b) Is she correct?
Give a reason for your answer.

**(1)**

Coin B is going to be thrown 4000 times.

(c) Work out an estimate for the number of times coin B will land on Heads.

**(2)**

**(Total for Question 16 is 5 marks)**
