**20** There are only red counters, white counters, blue counters and green counters in a bag.

Chris is going to take at random a counter from the bag.

The table shows the probability that he will take a red counter and the probability that he will take a white counter.

| **Colour** | red | white | blue | green |
|---|---|---|---|---|
| **Probability** | 0.3 | 0.1 | | |

There are twice as many blue counters as there are green counters in the bag.

(a) Work out the probability that Chris will take a blue counter.

.....

**(3)**

There are 45 red counters in the bag.

(b) Work out the total number of counters in the bag.

.....

**(2)**

**(Total for Question 20 is 5 marks)**
