5			N2L gives $4000-800=1200a$ $a=\frac{8}{3}$ m s^{-2} Using $v=u+at$ gives $v=\frac{8}{3}\times 9=24$ m s^{-1}	**M1** **A1** **M1** **A1** **[4]**	**3.1b** **1.1b** **3.3** **1.1b**	Both forces present; allow sign errors Soi Using *suvat* equation(s) leading to a value for v **FT** their a	Allow for $3200=1200a$ seen
