| Question | | | Answer | Marks | AO | Guidance | |
|---|---|---|---|---|---|---|---|
| 5 | | | Moments about A | | | | |
| | | | $0.1 \times 0.12g = 0.11P$ | **M1** | **3.1a** | Attempt to calculate a moment of at least one force about any point | Do not award for oblique distance(s) used without resolving the forces |
| | | | | **A1** | **2.1** | Correct moment of weight about A | |
| | | | $P = 1.07$ | **A1** | **2.1** | **AG** 1.07 obtained from correct total moment equation seen | 1.06909…<br>Award if full equation or $10 \times 0.12g$ and $\frac{11.76}{11} = 1.07$ seen |
| | | | | **[3]** | | Allow full credit for taking moments about another point where the correct force(s) at the hinge is seen. | |
