3			AC = [AO – OC] $=1-\cos\theta$ or $\cos\theta=1-AC$	**M1**	**1.1a**	**AG** Allow AC = AO – OC with $OC=\cos\theta$ for M1		
			θ small so AC $1-\left(1-\frac{\theta^2}{2}\right)=\frac{\theta^2}{2}$	**E1**	**2.1**	Convincing completion
