Question			Answer	Marks	AOs	Guidance	
9	(i)		$y = \dfrac{e^x}{1-e^x}$				
			$y(1-e^x) = e^x$	M1	1.1a	Clearing fractions	x and y may be interchanged at any stage
			$[\, y = e^x(1+y)]\quad e^x = \dfrac{y}{1+y}$	A1	1.1	Expression for e^x	
			$f^{-1}(x) = \ln\left(\dfrac{x}{1+x}\right)$	A1 [3]	2.1	Condone '$y =$ ' Condone no brackets or mod	
9	(ii)		$f^{-1}(x) \neq 0$	B1 [1]	1.2	Allow $y \neq 0$ but not $x \neq 0$	
			$(2-a) \qquad (4-a)$
