			$\dfrac{}{(1+e^x)^2}$				Use of quotient rule or product rule	
10			or $f'(x) = \dfrac{e^x}{1+e^x} - \dfrac{e^{2x}}{(1+e^x)^2}$ from product rule	**M1** **A1**	**1.1a** **1.1**	(allow one error) Correct derivative		
			$f'(x) = \dfrac{e^x}{(1+e^x)^2}$	**M1**	**2.1**	Simplifying derivative to a form which shows it is positive		
			$f'(x) > 0 \Rightarrow$ f(x) is an increasing function for all x	**E1**	**2.4**	All correct and clear completion
