6 The probability distribution of the discrete random variable X is shown in the table.

x	0	1	2	3
$P(X = x)$	0.2	a	$3a$	0.4

(a) Calculate the value of the constant a. **[1]**

(b) A single value of X is chosen at random.

Find the probability that the value is an odd number. **[1]**

(c) **Two** independent values of X are chosen at random.

Calculate the probability that the total of the two values is 3. **[3]**

6(a)	
6(b)	
6(c)
