1 The function $\mathrm{f}(x)$ is defined for all real x by

$\mathrm{f}(x) = 3x - 2$.

(a) Find an expression for $\mathrm{f}^{-1}(x)$. **[2]**

(b) Sketch the graphs of $y = \mathrm{f}(x)$ and $y = \mathrm{f}^{-1}(x)$ on the same diagram. **[2]**

(c) Find the set of values of x for which $\mathrm{f}(x) > \mathrm{f}^{-1}(x)$. **[2]**
