2 You are given that

$f(x) = \frac{3}{x}$ on the domain $\{x : x \in \mathbb{R}, x \neq 0\}$

$g(x) = x - 1$ on the domain $\{x : x \in \mathbb{R}\}$.

Find $gf(x)$. You must state the domain. **[2]**

2	
	$gf(x) =$
	Domain of $gf(x)$:
