

Question	Working	Answer	Mark	Notes
5		70.5	P1	starts process of Pythagoras e.g. $5^2 + 12^2$
			P1	complete process for Pythagoras e.g. $\sqrt{5^2 + 12^2}$ or $\sqrt{25 + 144}$ or $\sqrt{169}$ (=13)
			P1	(dep P1 for Pythagoras) process of adding all the lengths e.g. $5 + 5 + 12 + 12 + \text{“13”}$ (=47)
			P1	(indep) process of multiplying at least 2 lengths by 1.5
			A1	cao
				SC: any evidence of working with Pythagoras award the P1 or P2
